

Student is craving a coffee and wants to study at a cafe, but she's worried she's been spending too much on items at a cafe

She decides to check her app to get a better picture on what she should do

You can check what deals are available at your local cafe. This will help her save money when she feels the urge to go to a cafe

You can also budget money based on your weekly spending and cafe visits. This will help her physically see how much she's spending per week

She can also set up a cafe environment through video or music (as well as a coffee recipe of the week). This helps set up the cafe vibe

She ended up saving her money since she's over budget and set an at home cafe env.
